Safety Source offers an affordable, no hassle solution for providing high quality prescription safety eyewear to your employees.

Eliminate the aggravation of dealing with optical outlets and their incredibly high cost of products and services.

All the elements of an effective program are included with Safety Source handling the complicated, but necessary, details with fabrication laboratories and dispensing opticians.

Safety Source delivers the option of fitting your budget by choosing only what you need, instead of having to select from a pre-priced package.

# No Hassle Safety Prescription Eyewear Service

The all-inclusive program from Safety Source includes everything you need to protect your employees from eye hazards in virtually any work environment. We offer the latest lens and coating technology from the world's leading provider, and ANSI Z87 rated safety frames from every major manufacturer.

## Simplicity

Complete service is our commitment to you, removing the complexity so much a part of most programs. We offer options for dispensing services that provide professional frame selection and fitting for your employees, either with our On-Site Licensed Optician or from a fully guided Local Optician. All that's required from your employee is an up to date copy of their doctor provided prescription. We do the rest from there!

## Custom Eyewear

## On Site Dispensing

Available in Massachusetts,  
Rhode Island and southern  
New Hampshire

## Savings

The Safety Source straightforward pricing program allows you to totally control the cost of the Prescription Safety Eyewear package that you provide. You choose the options you want to cover, including a wide selection from Basic through Premium safety frames and lens options to cover virtually any need. Some companies choose to limit costs by establishing a maximum allowance with overage paid by the employee to Safety Source. You pay for only what you need instead of package pricing.

## Service

Safety Source lives by the principle "as fast as accuracy will permit" and that is especially true in our Prescription Safety Eyewear program. All products fully comply with the applicable ANSI Z87 Standard and are produced in accordance with all the production requirements of the ANSI Z80 Standard. Our response time is usually only a few days, with prompt delivery. Emergency service is available when needed.
